EDUCATION

MCKV INSTITUTE OF ENGINEERING

FULL-TIME B. TECH COMPUTER SCIENCE ENGINEERING IN DATA SCIENCE

GPA: 7.01

2021-09-01 - 2025-06-30

Howrah, West Bengal, India

EXPERIENCE

ARDENT | FULL STACK WEB DEVELOPMENT INTERN Kolkata, West Bengal, India | 2024-07-01 – 2024-08-31

Developed features for a full-stack job portal application using the MERN stack. Implemented application workflows including user authentication, database operations, and frontend-backend integration. Debugged and tested application components and collaborated on feature development and documentation.

SKILLS

PROGRAMMING LANGUAGES	Python, SQL
LIBRARIES/Frameworks	FastAPI, Keras, PyTorch, TensorFlow, Scikit-Learn, XGBoost, OpenCV, NumPy, Pandas, MERN
TOOLS / PLATFORMS	Docker, CI/CD, Git, Streamlit
DATABASES	SQLite

PROJECTS / OPEN-SOURCE

THEDU RELEVANCE-FIRST LOCAL SEARCH ENGINE BM25, Inverted Index, SQLite, FastAPI, Docker, CI/CD, REST API, Testing

Built a lightweight relevance-first local search engine prototype with deterministic tokenization, inverted index, BM25 ranking, SQLite-based document storage, REST API and CLI interfaces, automated testing, CI workflows, Docker-based execution, and documentation.

RANSOMWAREWATCH AI-POWERED CYBERSECURITY DETECTION SYSTEM
WCGAN-GP, XGBoost, Streamlit, SHAP, Docker, Machine Learning

PyTorch,

Designed an end-to-end machine learning pipeline for ransomware detection using the CICIDS 2017 dataset. Implemented a WCGAN-GP module in PyTorch for synthetic data generation, trained an XGBoost classifier, produced evaluation artifacts (confusion matrices, ROC curves, PDF reports), built a Streamlit application for training and SHAP-based explanations, and containerized the application with Docker.

CERTIFICATIONS

- Generative AI - GREAT LEARNING
- Python - Udemy
